

How to add a second device to your LuxTrust certificate?

It is possible to associate several devices to a LuxTrust account : a Token, a LuxTrust Scan and two LuxTrust Mobile applications.

If you already have a LuxTrust device and you like to add a second device to your LuxTrust certificate, you can connect yourself to *LuxTrust.lu > MyLuxTrust > My devices* and then "Add a device".

After having confirmed to add a second device, it will be linked to your LuxTrust certificate and directly useable with the same UserID and Password.

If you would like to add a second LuxTrust mobile application, then you can associate it to your LuxTrust certificate directly from the app.
