

How to choose between a Smartcard and a Signing Stick?

As a first step you have to check if your application allows to use a chip-based device such as a Smartcard or Signing Stick. All applications are available in the section Products > Available applications or applications.luxtrust.lu. The second step for choosing between the two devices is:

- to identify your utilisation needs: the Smartcard requires a card reader, neither the Signing Stick, nor the token.
- and to analyse the tariffs
