

Can I install LuxTrust Mobile on a second phone?

Yes, you can connect up to two LuxTrust Mobile applications to your LuxTrust identity. If you would like to use a second app, then you have to download it and associate it to your LuxTrust certificate (feature accessible directly on the app).

If you want to associate more than two smartphones to your LuxTrust identity, the app will request you to delete one. So, choose carefully the name of your device when activating the app to ease the (de)activation of other future devices.
