

## In which context will I see my secret image?

---

Each time you need to use your LuxTrust Token or chip-based product for online banking or e-government application, you will see your secret image at the moment you enter your OTP or PIN code (for instance to authenticate yourself, add beneficiaries, validate a transaction above a certain amount). Other partners might integrate this function in future releases.

Your secret image will be shown **each time** you have to enter your OTP or PIN code
